## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In the Drawings, Fig.1B has been labeled as --PRIORT ART--. In Fig.17, the dotted box has been labeled as --47--.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose an electron tube device mounted with a cold cathode and method of impressing voltages on electrodes of the electron tube device mounted with the cold cathode having, inter alia, a power supply unit for finally impressing the gate electrode voltage at the rise time of said device and first shutting off the gate electrode voltage at the fall time of said device, as recited in claims 8, 17, 18 and 25. The examiner has then allowed claims 8, 17, 18 and 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tsuida et al., Patent No. 6,583,567; Tsuida et al., Patent No. 6,310,438; Takahashi, Patent No. 6,114,808 ; Seko et al., Patent No. 6,377,231.

None of the above patents discloses the functional limitation "finally impressing the gate electrode voltage at the rise time of said device and first shutting off the gate electrode voltage at the fall time of said device", as recited.
